Location: Cairo, Egypt

Summary

Junior Data Analyst / Business Intelligence Analyst with 1+ year of experience **extracting insights from large-scale healthcare and business datasets** (100K–1M+ records) using Python, SQL, Excel, Power BI, and Tableau. Delivered 7+ end-to-end analytics projects that **optimized operations, reduced delays, and informed data-driven decisions by up to 40%**. Skilled in KPI tracking, executive dashboards, trend identification, root-cause analysis, and presenting actionable insights to stakeholders.

Skills

- **Data Analysis & Business Intelligence:** Exploratory Data Analysis (EDA), Statistical Analysis, KPI Tracking, Root Cause Analysis, Business Intelligence Reporting
- **Programming & Databases:** Python (Pandas, NumPy), SQL (Joins, Aggregations, CTEs, Window Functions), SQL Server
- **BI & Visualization Tools:** Power BI (DAX, Measures, Dashboards), Tableau, Microsoft Excel (Pivot Tables, Advanced Formulas)
- **Machine Learning & Analytics:** Customer Segmentation, Predictive Modeling, Feature Engineering, Imbalanced Data Handling
- **Tools & Platforms:** Jupyter Notebook, Git, GitHub
- **Additional:** C, C++, Flutter, Dart, REST APIs
- **Soft Skills:** Stakeholder Communication, Data Storytelling, Cross-Functional Collaboration

Experience

- **DEPI — Data Engineering & Data Science Trainee** *Feb 2026 – Present*
  - Enrolled in the **Microsoft Data Engineer** program, gaining practical experience with **SQL, Microsoft Azure**.
  - Completed and currently progressing through modules including: SQL & Database Management (current), Advanced Python for Data Engineering, Data Pipelines, Big Data Processing, Microsoft Azure Data Engineer Associate, Deployment, AI for Data Engineers.
  - Building hands-on skills in **data management, processing, and analytics** with Microsoft tools.
- **IDH (Integrated Diagnostics Holdings) — Data Scientist Intern** *Aug 2025 – Sep 2025*
  - **Examined** 500K+ healthcare and laboratory records using Python and SQL to identify operational bottlenecks through data cleaning, preprocessing, and EDA.
  - **Developed** 6+ Power BI dashboards to monitor KPIs across test lifecycle stages, increasing visibility into performance and delays.
  - Identified recurring delay patterns, enabling a projected 15% improvement in turnaround times through better monitoring and escalation.
  - Applied customer segmentation and predictive modeling to forecast demand and optimize resource allocation.
- **2B Company — CRM Intern (Siebel)** *Sep 2024 – Oct 2024*
  - Managed customer data and customized workflows within Siebel CRM systems.
  - Assisted with troubleshooting, testing, and documentation, improving CRM efficiency and adoption.

Projects

- **IDH Daily Visits Analysis | Excel, Power BI, Python**
  - Standardized 100K+ branch visit records for analysis.
  - **Constructed** Power BI dashboards tracking daily visits, unique visit rates, and branch-level KPIs.
  - Highlighted performance gaps, improving operational efficiency by ~20%.
- **IDH Test Delay Analysis | Power BI, SQL Server**
  - **Investigated** 500K+ lab records to identify delay patterns.
  - Built dashboards visualizing delays across departments and stages.
  - Enabled proactive monitoring, reducing turnaround time by ~15%.
- **IDH House Call Prediction | Python, Pandas, Scikit-learn**
  - **Developed** predictive models on 1M+ imbalanced records to forecast house call demand.
  - Performed feature engineering, data preprocessing, and resampling to improve accuracy.
  - Enhanced forecasting and resource allocation effectiveness by ~18%.
- **Customer Churn Analysis | Python, Pandas, Power BI** (GitHub)
  - **Explored** large-scale customer datasets to evaluate churn behavior.
  - Conducted segmentation and behavioral analysis to identify high-risk groups.
  - Delivered actionable insights for targeted retention strategies.
- **HR Employee Attrition Analysis | Python, SQL Server, Power BI** (GitHub)
  - Built an ETL and analytics pipeline on 10K+ employee records.
  - **Identified** key attrition drivers through statistical analysis and visualizations.
  - Designed dashboards supporting HR retention and workforce planning decisions.
- **Sales Analytics Dashboard | Excel** (GitHub)
  - Interactive Excel dashboard analyzing 60K+ transactions to extract business insights.
  - Key findings: top 5 products generate 31.5% of profit, 50+ age group contributes ~40% of profit, weekdays generate 71.8% of profit.

Education & Certifications

Bachelor of Engineering – Telecommunications Engineering (In Progress) **GPA 3.1**
Beni-Suef University, **Beni-Suef**
Expected Graduation: ***June 2026***
Courses :

- **Data Analysis** *Jun 2025 – Dec 2025*
  Vocat Academy — Learning data manipulation, visualization, SQL, Database and analysis using Python libraries such as Pandas, NumPy, and Matplotlib.
- **Data Analysis Training** *Jul 2025 – Aug 2025*
  NTI — Python, SQL, Power BI, Tableau, data cleaning, EDA, visualization, KPI dashboards, and actionable insights.
- **Machine Learning** *Aug 2025 –Sep 2025*
  Self-paced — Covering supervised and unsupervised learning, model evaluation, and real-world applications of machine learning in data-driven decision-making.
- **Advanced Microsoft Excel for Engineers** *Jun 2024 – Sep 2024*
  Self-paced — Focused on formulas, pivot tables, data visualization, conditional formatting, and basic automation for engineering data tasks.
- **C Programming, Data Structures & Algorithms** *Jan 2024 – May 2024*
  Online Course — Strengthened foundational programming and problem-solving skills with arrays, linked lists, trees, and sorting/searching algorithms.
- **Flutter Mobile App Development** *Dec 2024 – Jun 2025*
  Route Academy — Training in building responsive cross-platform apps using Flutter, with hands-on projects and clean architecture patterns.
